Profile

I am a passionate Front End Engineer who loves problem solving, learning, and daily growth. I have excellent oral, written, and interpersonal communication skills.

Experience

Poly

June 2020 – Present

Software Engineer Santa Cruz, CA.

- Part of core team who built the Poly Lens desktop application from scratch
- Worked closely with design team to bring Figma design specifications to actual functioning UI
- Assisted back end team with designing and integrating GraphQL endpoints with front end clients
- Developed wellness features into Poly Lens desktop application to remind users to take water and vision breaks on a configurable schedule as well as white noise features to improve productivity
- Helped in growing Poly Lens web client into a more feature rich application which included remote management of devices and users

Poly

June 2018 – June 2020

Front End Developer Santa Cruz, CA.

- Led reskin of marketing website working closely with the UI/UX design team
- Developed AEM components and page templates based off of PDF design documents
- Built Solution Finder application to assist with customers finding the right solution for their needs
- Responsible for marketing websites front end performance, accessibility, and SEO
- Lead front end developer in charge of day to day maintenance and upkeep of the website

Plantronics

June 2016 – June 2018

Web Developer Santa Cruz, CA.

- Wrote web scraper using Java and jsoup to improve websites presentation of knowledge base articles which had been failing in responsive design
- Developed IOS application for our Executive Briefing Center using HTML, CSS, JavaScript, and Cordova
- Built custom AEM components based off of written and visual requirements from the business
- Was the lead in upgrading our AEM platform from AEM 6.2 - AEM 6.4
- Built product feeds for third party integrations using JSP
